

ENGINEERING MECHANICS I IN ROME

Program Description:

Engineering Mechanics I (Statics) is one of the most important courses in the engineering curriculum, so why not take it in one of the most illustrious European capitals? Rome was the first city in the ancient world to have what we would call modern infrastructure, and so many of the old structures still stand as testaments of engineering prowess. Students will have ample opportunities to explore the Eternal City, observe how the architecture relates to the course material, and absorb the local culture.

Program Dates:

July 5 – August 5, 2019

Application Deadline:

January 25, 2019

Course(s):

EM 2413: Engineering Mechanics I (3 credit hours)

Eligibility/Prerequisites:

MA 1723 Calculus I and PH 2213 Physics I are required prerequisites. Students need to have at least a 2.5 GPA in order to participate in this program.
