

GEOGRAPHY OF THE CARIBBEAN: THE BAHAMAS AND ST. KITTS

Program Description:

Geography of the Caribbean explores and compares the tropical island paradises of The Bahamas and St. Kitts. These are two very distinct island groups that have different geology, marine environments, climate, and culture. In the Bahamas, we will experience white sandy beaches, turquoise seas, caves, and extensive coral reef systems. On St. Kitts, we will explore volcanoes, rainforest and a rich Caribbean cultural history. This course satisfies a geography elective, and there is no better way of learning about an area than to experience it firsthand. This is especially true for the Caribbean.

Program Dates:

June 12 - 25, 2019

Application Deadline:

March 8, 2019

Course(s):

GG 4533/6533: Geosciences Study Abroad (3 credit hours)

Eligibility/Prerequisites:

Students need to have at least a 2.5 GPA in order to participate in this program.

MISSISSIPPI STATE UNIVERSITY™
INTERNATIONAL INSTITUTE
