Natural Resource Management and Conservation in Poland

Program Description
The goal of the program is to provide students with an opportunity to learn about approaches used to manage forests and other natural resources in countries with differing ownership patterns. Students will have multiple opportunities to learn about natural resource conservation; commercial forestry on public lands; ecosystem services; conducting commercial forestry activities in ecologically and environmentally sensitive areas; forest protection; wildlife prevention; and resolving human conflicts associated with natural resource management and conservation.

For more information contact Program Director
Robert K. Grala, rgrala@cfr.msstate.edu
